PROJECTS

- Paytm Clone App** | *MongoDB, React.Js, ExpressJs, NodeJs, Git, JWT Tokens, VS Code*
- This project is a clone of the Paytm app, built using MongoDB, Express, and Node.js, with authentication handled by Zod and JWT.
 - Utilizes the MERN stack - MongoDB for the database, Express for the server framework, and Node.js for the back-end runtime environment
 - Employs JSON Web Tokens (JWT) for secure authentication, ensuring protected access to user-specific features and data.
 - Replicates key Paytm features such as user registration, login, digital payments, and wallet management, providing a seamless user experience.
- Real Time Weather Application** | *Javascript, HTML/CSS, EJS, API, Git, VS Code*
- Real Time Weather Application
 - Developed a real-time weather app using OpenWeatherMap APIs, offering users accurate weather updates globally. The app displayed current conditions, hourly forecasts, and alerts.
 - Handles API requests efficiently, parsed responses, and featured error handling for reliability. The result was a user-friendly tool for accessing precise weather information anytime, anywhere
